Abstracts

The global Isoprenol market size is expected to reach \$ 301 million by 2032, rising at a market growth of 2.5% CAGR during the forecast period (2026-2032).

Isoprenol is a type of hemiterpene alcohol and known as 3-methyl-3-butene-1-ol (3, 3, 1). It is a clear, colorless liquid produced industrially as an intermediate to 3-methyl-2-butene-1-ol (prenol, 3, 2, 1).

Isoprenol, as a key raw material, is experiencing continuously rising demand across multiple end-use industries.

Fragrance and Flavor Industry: Isopentenol is an important intermediate in the synthesis of terpene fragrances such as citral, and is widely used in daily chemicals, food, and cosmetics. Growth in this sector directly drives demand.

Pharmaceutical Industry: It is a key raw material for the synthesis of pharmaceutical intermediates and excipients such as isopentenol phosphate, used in the production of specific drugs.

Agrochemical Industry: As an important intermediate in the synthesis of highly effective and low-toxicity pesticides (such as pyrethroid insecticides), its demand is steadily increasing with the modernization of global agriculture.

High-Performance Polymers and Concrete Admixtures: As a key raw material, isopentenol can be used in the production of polycarboxylate superplasticizers, which are crucial for modern high-performance concrete, resulting in strong demand in the construction industry.

This report studies the global Isoprenol production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Isoprenol and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
