The global Isotropic Graphite market size is expected to reach \$ 1493.6 million by 2029, rising at a market growth of 2.4% CAGR during the forecast period (2023-2029).

Global key players of isotropic graphite include Toyo Tanso, Tokai Carbon, Mersen, IBIDEN, SGL, etc. The top five players hold a share about 64%. China is the largest producer, has a share about 42%, followed by Japan and North America, with share 26% and 14%, respectively. The largest market is Asia-Pacific, with a share about 65%, followed by North America and Europe, with share 14% and 8%, separately.

Isotropic graphite is a kind of graphite material that crystals are disorderly arranged while having an isotropic structure. Isotropic graphite is a ultra-fine grain graphite used for applications where the mechanical properties of other fine grain graphite are inadequate. Its name is derived from the method of production: During the forming process the material is isostatically pressed i.e. with equal pressure from every side. Therefore the material shows typically an isotropic property behavior. Nowadays Isotropic Graphite is quite popular material that is in great demand in the photovoltaic industry and is indispensable in semiconductors production.
