Abstracts

The global Isotropic and Extruded Graphite market size is expected to reach \$ 1745 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Isotropic graphite is a kind of graphite material that crystals are disorderly arranged while having an isotropic structure. Isotropic graphite is a ultra-fine grain graphite used for applications where the mechanical properties of other fine grain graphite are inadequate. Its name is derived from the method of production: During the forming process the material is isostatically pressed i.e. with equal pressure from every side. Therefore the material shows typically an isotropic property behavior.

Toyo Tanso, Tokai Carbon, Mersen, IBIDEN and SGL are the leaders of the Isotropic and Extruded Graphite industry, which take about 55% market share. Japan is the major region of the global market, which takes about 50% market share.
