According to our (Global Info Research) latest study, the global ISR Video Encoder/Decoder market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Intelligence, surveillance and reconnaissance (ISR) video encoders/decoders are devices specifically designed to process and transmit video data and are used in ISR systems. Encoders compress real-time video from drones, monitors or sensors into a smaller format for efficient transmission over bandwidth-limited networks, while decoders decode the video back into a visual format for analysis and monitoring at the receiving end. These devices ensure high-quality transmission of video data, supporting remote commanders in real-time observation and decision-making of battlefields, borders or other surveillance areas.
