According to our (Global Info Research) latest study, the global IT Asset Management market size was valued at USD 2319.7 million in 2023 and is forecast to a readjusted size of USD 3381.4 million by 2030 with a CAGR of 5.5% during review period.

IT asset management (ITAM) is the set of business practices that join financial, contractual and inventory functions to support life cycle management and strategic decision making for the IT environment. Assets include all elements of software and hardware that are found in the business environment.

IT asset management is an important part of an organization's strategy. It usually involves gathering detailed hardware and software inventory information which is then used to make decisions about hardware and software purchases and redistribution. IT inventory management helps organizations manage their systems more effectively and saves time and money by avoiding unnecessary asset purchases and promoting the harvesting of existing resources.
