## Abstracts

IT security is the practice of preventing unauthorized access, use, disclosure, disruption, modification, inspection, recording or destruction of information. To standardize this discipline, academics and professionals collaborate and seek to set basic guidance, policies, and industry standards on password, antivirus software, firewall, encryption software, legal liability and user/administrator training standards. This standardization may be further driven by a wide variety of laws and regulations that affect how data is accessed, processed, stored, and transferred.

### Scope of the Report:

This report studies the IT Security Consulting Services market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the IT Security Consulting Services market by product type and applications/end industries.
