## Abstracts

According to our (Global Info Research) latest study, the global IT Security Consulting Services market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

IT security is the practice of preventing unauthorized access, use, disclosure, disruption, modification, inspection, recording or destruction of information. To standardize this discipline, academics and professionals collaborate and seek to set basic guidance, policies, and industry standards on password, antivirus software, firewall, encryption software, legal liability and user/administrator training standards. This standardization may be further driven by a wide variety of laws and regulations that affect how data is accessed, processed, stored, and transferred.

The increasing use of mobile devices and cloud servers to store sensitive data and the subsequent rise in technologically sophisticated cyber criminals threatening to steal that data have accelerated growth in the IT Security Consulting industry. This industry offers managed IT security Services, such as firewalls, intrusion prevention, security threat analysis, proactive security vulnerability and penetration testing and incident preparation and response, which includes IT forensics.

The Global Info Research report includes an overview of the development of the IT Security Consulting Services industry chain, the market status of Commercial (Internet Security, Endpoint Security), Industrial (Internet Security, Endpoint Security), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of IT Security Consulting Services.
