According to our (Global Info Research) latest study, the global IV Hydrogen Vessels market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

In order to further reduce the self-weight of the high-pressure hydrogen storage vessel, increase the hydrogen storage density of the system, and reduce the cost at the same time, the metal lining is replaced with a plastic lining. Other structures and manufacturing processes are basically the same as those of the metal-lined composite pressure vessel. The fourth-generation fully composite plastic high-pressure hydrogen storage container.
