## Abstracts

The global J Acid market size is expected to reach \$ 264 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

J acid is a typical naphthalene sulfonic acid organic intermediate, which has reaction sites such as amino and phenolic hydroxyl groups, and can construct a stable chromophore in coupling reactions. Therefore, it is widely used in the synthesis of reactive dyes, acid dyes, direct dyes, as well as some organic pigments and ink pigments. It is one of the rigid basic intermediates in the dye and pigment industry chain. In 2025, global J Acid production reached approximately 23.08 K MT, with an average global market price of around US\$ 8,234 per MT.

The overall stock of J acid exhibits stable and cyclical fluctuations, with demand highly linked to textile printing and dyeing operating rates, packaging printing, and plastic coloring prosperity. Price elasticity is mainly influenced by upstream naphthalene based raw materials and sulfonation related costs, environmental and safety regulatory intensity, as well as industry operating and inventory rhythms; The focus of competition on the supply side is shifting from simply combining production capacity to combining specifications and consistency. Enterprises that can stably control inorganic salt residues, metal impurities and impurity spectra, and maintain batch consistency are more likely to enter the high-end pigment and export customer system and obtain premiums, while low-end standard products are more likely to fall into price competition and profit fluctuations.

This report studies the global J Acid production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for J Acid and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of J Acid that contribute to its increasing demand across

many markets.
