A Japanese Style sit-down shower is a bathroom facility designed specifically for the elderly, disabled, or those with limited mobility. It is defined as a thermostatic shower system with an integrated seat, armrests, control panel, and multi-directional spray arms (or shower head). It allows users to enjoy a full-body shower while seated, reducing the risk of falls due to slippery floors and providing a safe and comfortable experience. It is commonly used in home-based aging and care facilities.

Upstream suppliers include plastics/composites, aluminum or stainless-steel frames, hardware, and plumbing components; midstream covers assembly and modular integration; downstream demand comes mainly from residential accessibility retrofits, senior living facilities, rehabilitation centers, and rental renovations, with aging demographics as the long-term structural driver.
