According to our (Global Info Research) latest study, the global Jaw Crushers market size was valued at US\$ 2203 million in 2024 and is forecast to a readjusted size of USD 2817 million by 2031 with a CAGR of 3.6% during review period.

A Jaw Crusher is one of the main types of primary crushers in an ore processing or a mining plant. A Jaw Crusher lessens large size rocks or ore by having placed the rock into compression. A fixed jaw, mounted in a 'V' alignment is the stationary breaking surface, whereas the mobile jaw exerts force on the rock by forcing it against the stationary plate. The space at the bottom of the 'V' aligned jaw plates is the crusher product size gap, or the size of the crushed product from the jaw crusher. The rock stays in the jaws till it is small enough for passing through the gap at the jaws' bottom.

Global Jaw Crushers key players include Sandvik, Metso, Terex, etc. Global top three manufacturers hold a share about 40%.

Europe is the largest market, with a share over 35%, followed by China and North America, both have a share over 40 percent.

In terms of product, Less than 300tph is the largest segment, with a share about 55%. And in terms of application, the largest application is Construction, followed by Mining.
