According to our (Global Info Research) latest study, the global Jellies and Gummies market size was valued at USD 2662.9 million in 2023 and is forecast to a readjusted size of USD 3225.4 million by 2030 with a CAGR of 2.8% during review period.

Jellies and Gummies are candies that have a hard sugar shell with a soft center.

There is a clear distinction between a gummy and jelly candy. Gummy candy, as the name suggests, has a gummy texture. Not quite like chewing rubber bands or calamari, but certainly more elastic than any other soft candy. Since gelatin is the only material that gives that texture, by definition, gummies are made with gelatin.

Jelly candies are solidified using carbohydrates, not proteins. So, a jelly bean center is usually made with corn starch. Other jelling ingredients are pectin, tapioca, and potato or arrowroot starch.
