According to our (Global Info Research) latest study, the global Jet Dispenser market size was valued at USD 1374.9 million in 2023 and is forecast to a readjusted size of USD 3158 million by 2030 with a CAGR of 12.6% during review period.

Jet dispenser is mainly used to solve the problem of precision electronic dispensing and research and development of a machine, is a branch of many dispensing machines. The jet dispenser smears, pots, and drips electronic glue onto the product to make the product bond, insulate, fix, and smooth the surface. The dispensing trajectory can be independently programmed according to production needs, and can be used for dispensing on any non-plane. The jet dispensing machine has the characteristics of ultra-high dispensing speed and precise dispensing, which can not only improve the consistency of dispensing, reduce material waste, but also improve work efficiency and quality. Jetting produces dots of extremely small size, low volume and high consistency. The jet dispenser can effectively reduce labor costs, contribute to the further improvement of product value, and is widely used.

Global key players of jet dispenser include Musashi, Nordson and TENSUN, the top three players hold a share over 50%.
