Abstracts

The global Jet Dispenser market size is expected to reach \$ 3158 million by 2029, rising at a market growth of 12.6% CAGR during the forecast period (2023-2029).

Global key players of jet dispenser include Musashi, Nordson and TENSUN, the top three players hold a share over 50%. Asia-Pacific is the largest market of jet dispenser, with a share about 87%, followed by North America and Europe, with shares about 4% and 5% separately. In terms of product type, floor type is the largest segment, with a share about 57%. And in terms of application, consumer electronics is the largest application, with a share about 62 percent.

Jet dispenser is mainly used to solve the problem of precision electronic dispensing and research and development of a machine, is a branch of many dispensing machines. The jet dispenser smears, pots, and drips electronic glue onto the product to make the product bond, insulate, fix, and smooth the surface. The dispensing trajectory can be independently programmed according to production needs, and can be used for dispensing on any non-plane. The jet dispensing machine has the characteristics of ultra-high dispensing speed and precise dispensing, which can not only improve the consistency of dispensing, reduce material waste, but also improve work efficiency and quality. Jetting produces dots of extremely small size, low volume and high consistency. The jet dispenser can effectively reduce labor costs, contribute to the further improvement of product value, and is widely used.
