Abstracts

The global Jewellery market size is expected to reach \$ 256901 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Jewelry refers to works of art made primarily of precious metals (such as gold, silver, and platinum) and gemstones (such as diamonds, rubies, and sapphires), designed and crafted for wearing, decoration, or collection. It not only possesses decorative beauty but also carries symbolic meanings of culture, emotion, and status. Common forms include rings, necklaces, earrings, bracelets, and brooches. Jewelry is not merely a symbol of luxury but also a carrier of emotion and a microcosm of culture. With the diversification of consumer aesthetics and the increasing demand for personalization, the jewelry industry is gradually shifting from a traditional focus on the value of precious metals to a design-driven approach that resonates with emotional connection. The average price of a piece of jewelry is approximately \$625, with global sales reaching approximately 305 million pieces.

This report studies the global Jewellery production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Jewellery and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
