## Abstracts

The global Jewelry Chain Manufacturing Machine market size is expected to reach \$ 550 million by 2032, rising at a market growth of 6.5% CAGR during the forecast period (2026-2032).

In 2025, global sales of jewelry chain manufacturing machines reached 3,600 units, with an average selling price of US\$95,000. Jewelry chain manufacturing machines are precision processing equipment that integrates wire drawing, winding, chain braiding, welding and shaping. They are mainly used for the continuous and highly consistent production of precious metal chains such as gold, silver, platinum and karat gold. They are characterized by high processing precision, high degree of automation and low material loss, and are widely used in jewelry manufacturing enterprises and precious metal processing plants. Its upstream raw materials and core components include high-precision motors, CNC systems, micro-welding units, mold components, and steel-aluminum structural parts. On average, each machine consumes approximately 3.2 tons of structural steel, 180 kg of electrical control and drive components, and 45 kg of precision molds. Downstream, it mainly supplies jewelry brands and OEM manufacturers, with gold chains accounting for 50%, K-gold and platinum chains accounting for 30%, and silver jewelry and others accounting for 20%. The global total production capacity is approximately 6,000 units/year, with an industry gross profit margin of approximately 30%-40%. In terms of downstream consumption, new product development and capacity expansion account for 60%, while equipment updates and upgrades account for 40%. The future lies in upgrading to higher speeds, finer wire diameter processing, rapid switching between multiple specifications, and digital quality monitoring. Against the backdrop of stable growth in global jewelry consumption, increased trend of personalized customization, and rising labor costs, the market demand for jewelry chain manufacturing machines remains robust, presenting a

business opportunity for the continued expansion of niche, high-value-added equipment.
