Abstracts

The global Jigs and Fixtures market size is expected to reach $ 12303 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

Jigs and fixtures are dedicated or modular manufacturing aids designed to locate, support, hold and clamp workpieces, parts or assemblies in a predetermined and repeatable position during machining, welding, assembly, inspection and other production processes, while certain types of jigs additionally guide cutting tools or manufacturing operations. A jig typically combines workpiece location and holding with a guiding function for drilling, machining or assembly operations, whereas a fixture primarily establishes and maintains the positional relationship between the workpiece and a machine tool, robot, processing tool, assembly system or measurement system.

In terms of the supply landscape, the global jigs and fixtures market is characterized by significant regionalization and fragmentation, making it difficult to achieve the high level of market concentration seen in industries producing large-scale, standardized industrial equipment. North America and Europe possess comprehensive supply ecosystems for large-scale aerospace assembly tooling, automotive body-in-white (BIW) fixtures, modular fixtures, and high-end metrology fixtures; Germany, in particular, is home to a large number of specialized fixture manufacturing enterprises (*Vorrichtungsbau*). China’s supply structure has expanded significantly in recent years; beyond traditional players in automotive welding and inspection fixtures, new demand for customized jigs and fixtures is emerging in sectors such as consumer electronics, new energy vehicles (NEVs), batteries, servers, and semiconductor manufacturing.

Looking ahead, automotive body-in-white, welding and assembly fixtures are expected to remain the largest application group, but future demand will increasingly be driven by

vehicle-platform renewal, EV structural changes, multi-model flexible production and line retooling rather than vehicle production volume alone. Machining and modular fixturing should continue to benefit from automated workholding, zero-point positioning, multi-axis machining and high-mix manufacturing, although subdued investment conditions in parts of European manufacturing remain a near-term constraint. China represented approximately 32% of worldwide machine-tool consumption in 2025, illustrating the continued geographic shift of manufacturing capital expenditure toward Asia and supporting a corresponding redistribution of fixture demand. Electronics, EV batteries, AI servers and other precision assembly applications are expected to be among the faster-growing fixture segments. Aerospace provides another structural growth driver: Airbus delivered 793 commercial aircraft in 2025 and Boeing delivered 600, while Airbus' commercial aircraft backlog reached 8,754 units at year-end 2025 and increased to 9,222 units by the end of June 2026. These production backlogs support continued investment in assembly, positioning, drilling and other large-scale tooling as manufacturers raise output.

Report Scope

This report studies the global Jigs and Fixtures production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Jigs and Fixtures and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Jigs and Fixtures that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Jigs and Fixtures total production and demand, 2021-2032, (M Units)

Global Jigs and Fixtures total production value, 2021-2032, (USD Million)

Global Jigs and Fixtures production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (M Units), (based on production site)

Global Jigs and Fixtures consumption by region & country, CAGR, 2021-2032 &

(M Units)

U.S. VS China: Jigs and Fixtures domestic production, consumption, key domestic manufacturers and share

Global Jigs and Fixtures production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (M Units)

Global Jigs and Fixtures production by Type, production, value, CAGR, 2021-2032, (USD Million) & (M Units)

Global Jigs and Fixtures production by Application, production, value, CAGR, 2021-2032, (USD Million) & (M Units)

This report profiles key players in the global Jigs and Fixtures market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Ascent Aerospace, KUKA AG, Paslin Digital Technology, Broetje-Automation, Valiant TMS, CenterLine, DEMMELER, AMF, ROEMHELD, HIROTEC, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Jigs and Fixtures market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (M Units) and average price (US$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
