## Abstracts

Jigsaw Blades is the saw blades used in Jigsaw. A jigsaw is a handheld reciprocating saw with a small, narrow blade anchored at the top, in the tool, but loose at the bottom. Like a circular saw, the stereotypical image of someone using a jigsaw has them leaning over and holding material with one hand while driving the blade across it with the other. In a jigsaw, the blade “sticks out” of the bottom of the tool. Jigsaw is designed to cut curves and details which has a thin blade that can be tracked around a cutout so you get exactly the design you want.
