## Abstracts

The global Jump Starter market size is expected to reach \$ 394 million by 2032, rising at a market growth of 1.7% CAGR during the forecast period (2026-2032).

A jump start, also called a boost, is a method of starting a vehicle with a discharged starting battery. A temporary connection is made to the battery of another vehicle, or to some other external power source. The external supply of electricity recharges the disabled vehicle's battery and provides some of the power needed to crank the engine. Once the vehicle has been started, its normal charging system will recharge, so the auxiliary source can be removed. If the vehicle charging system is functional, normal operation of the vehicle will restore the charge of the battery.

North America is the largest market with about 50% market share. Europe and Asia-Pacific are follower, accounting for about 46% market share.

The key players are COBRA, Stanley Black & Decker, Inc, Benrong Group, Shenzhen SBASE, BOLTPOWER, CAR KU, China AGA, Newsmy, Shenzhen NianLun Electronic, KAYO MAXTAR, BESTEK etc. Top 5 companies occupied about 48% market share.
