The global Just Chatting Streaming market size is expected to reach \$ 1386 million by 2032, rising at a market growth of 9.8% CAGR during the forecast period (2026-2032).

Just Chatting is a popular live-streaming category, most notably on platforms like Twitch, where the primary focus is not on gaming or a specific skill, but on real-time social interaction between the streamer and the audience. Unlike traditional content-driven streams, Just Chatting allows creators to engage in informal conversations, react to online videos (reaction content), discuss current events, or share aspects of their daily lives. The essence of this format lies in its low-barrier to entry and the parasocial relationship it fosters, as viewers tune in more for the streamer's personality and the community atmosphere than for the specific activity being performed.
