According to our (Global Info Research) latest study, the global Ka-band Satcom Terminals market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Ka band satellite communications (SATCOM) frequencies provide new opportunities to meet high bandwidth demands, especially for small aerial, maritime and mobile land platforms supporting beyond line of sight requirements for networkcentric operations. This is possible due to the availability of 3.5GHz of bandwidth, and also because Ka ground segment components are typically smaller in dimension compared to those of Ku band. However, Ka band links experience much higher rain fades in tropical regions as compared to Ku band and C band. This report focus on Ka-band Satcom Terminals market.

The Global Mobile Economy Development Report 2023 released by GSMA Intelligence pointed out that by the end of 2022, the number of global mobile users would exceed 5.4 billion. The mobile ecosystem supports 16 million jobs directly and 12 million jobs indirectly.

According to our Communications Research Centre, in 2022, the global communication equipment was valued at US\$ 100 billion. The U.S. and China are powerhouses in the manufacture of communications equipment. According to data from the Ministry of Industry and Information Technology of China, the cumulative revenue of telecommunications services in 2022 was ?1.58 trillion, an increase of 8% over the previous year. The total amount of telecommunications business calculated at the price of the previous year reached ?1.75 trillion, a year-on-year increase of 21.3%. In the

same year, the fixed Internet broadband access business revenue was ?240.2 billion, an increase of 7.1% over the previous year, and its proportion in the telecommunications business revenue decreased from 15.3% in the previous year to 15.2%, driving the telecommunications business revenue to increase by 1.1 percentage points.
