The global Ka-Band Solid State Amplifiers market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029). SATCOM Amplifier is an electronic amplifier or electronic device that can increase the power of a signal (a time-varying voltage or current). An amplifier functions by using electric power from a power supply to increase the amplitude of the voltage or current signal. An amplifier is effectively the opposite of an attenuator: while an amplifier provides gain, an attenuator provides loss. Solid State Power Amplifier (SSPA) is a kind of SATCOM Amplifiers.
