## Abstracts

According to our (Global Info Research) latest study, the global Karate-Gi market size was valued at US\$ 74.5 million in 2024 and is forecast to a readjusted size of USD 112 million by 2031 with a CAGR of 6.6% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

A karategi is somewhat similar to a judogi as it shares a common origin; however, the material and cut of the uniform is generally much lighter and looser fitting. The heaviest of Karategi is only 0.5 kg (16 oz) compared to some judogi at 1 kg (35 oz). Because of the nature of Karate training which emphasizes striking, kicking, and a more limited range of standing throws compared to Judo the karategi has evolved in a manner that maximizes mobility and speed without the extremely coarse and strong fabric required for grappling and throwing found in Judo. They are made from smooth cotton which may be brushed or ribbed for unrestricted movement and added comfort. Reinforced stitching is common, as to compensate for the stresses put on the gi.
