According to our (Global Info Research) latest study, the global Kegel Exercise Device market size was valued at USD 154.4 million in 2023 and is forecast to a readjusted size of USD 286.7 million by 2030 with a CAGR of 9.2% during review period.

The use of Kegel exercise devices is increasing in popularity as more women and healthcare professionals are having open conversations about personal experiences with bladder leaks, the importance of pelvic floor health, and the prevalence of urinary problems in women. These devices are a great option for women who want to address a bladder problem or just continue to maintain a healthy pelvic floor.

Kegel exercises (aka Kegeling) are one of the most important things you can do to improve reproductive and urinary health. By identifying and isolating your pelvic floor muscles, then exercising these muscles through a series of contractions, you are conditioning your pelvic floor. The improved muscle tone can mean longer time between trips to the bathroom, fewer leaks, speedier recovery from childbirth, and possibly more intense orgasms.

Global key players of Kegel Exercise Device include Elvie (Chiaro Technology Ltd), Epi-No, Perifit, INNOVO, Kegel8, etc. The top five players hold a share over 40%. Europe is the largest market, has a share about 38%, followed by North America and Asia-Pacific, with share about 37% and 19%, separately. In terms of product type, biofeedback is the largest segment, with a share over 50%. In terms of product application, the largest application is female, with a share over 80%, followed by male.
