According to our (Global Info Research) latest study, the global Kidney Stone Retrieval Device market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Kidney stone retrieval devices are associated with the treatments or surgeries done for removal of kidney stone. Most of kidney stone patient are having small stone that passes through urine, larger stones may need to be broken by ultrasound or laser energy. Usually, surgeries are needed in patients having very large kidney stones. The disorder related with kidney stone is referred as urolithiasis, Kidney stone retrieval devices help to remove or break down kidney stones by providing treatment for urolithiasis.

North America is the dominating market for kidney stone retrieval devices owing to factors such as high prevalence of kidney stone and proportion of reappearance of kidney stone in the region, more preference for minimally invasive procedures, higher awareness and promising reimbursement arrangement are the prime factors that support the dominance of North America on the global front.
