Scope of the Report:

This report focuses on the Kinesiology Tape in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

There is a very obvious OEM phenomenon in kinesiology tape industry. China as the Asian representation region is the main OEM kinesiology tape manufacturing country. Due to China's relatively low labor costs, raw material costs, the prices of OEM product are very low. But the OEM factory's own brand sales are very poor due to its unknown brand.

The industry is currently in the developing stage. The next five years, the growth rate of the Kinesiology Tape consumption will show a smooth down curve. The slow downward trend in recent years will maintain in the future. As competition intensifies, prices will also show a downward trend. Similarly, there will be fluctuation in gross margin.

Proposal to increase the use of product publicity and free courses investment, expand product awareness, to help consumers use the product correctly to play the original effect.

The worldwide market for Kinesiology Tape is expected to grow at a CAGR of roughly 8.5% over the next five years, will reach 290 million US\$ in 2023, from 180 million US\$ in 2017, according to a new GIR (Global Info Research) study.
