The global Kiosk Software market size is expected to reach \$ 2409 million by 2032, rising at a market growth of 15.8% CAGR during the forecast period (2026-2032).

Kiosk software is the system and user interface software designed for an interactive kiosk or Internet kiosk. Kiosk software locks down the application in order to protect the kiosk from users. Kiosk software may offer remote monitoring to manage multiple kiosks from another location. Email or text alerts may be automatically sent from the kiosk for daily activity reports or generated in response to problems detected by the software. Other features allow for remote updates of the kiosk's content and the ability to upload data such as kiosk usage statistics. Kiosk software is used to manage a touchscreen, allowing users to touch the monitor screen to make selections. A virtual keyboard eliminates the need for a computer keyboard.

USA is now the key developers of Kiosk Software. The key players are Provisio, KioWare, KIOSK Information Systems, DynaTouch and Meridian, Top 5 took up about 31% of the global market, besides, there are some local vendors in every country.
