Abstracts

The global Kitchen Knife market size is expected to reach \$ 2752 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

A kitchen knife is any knife that is intended to be used in food preparation. While much of this work can be accomplished with a few general-purpose knives – notably a large chef's knife, a tough cleaver, and a small paring knife – there are also many specialized knives that are designed for specific tasks. Kitchen knives can be made from several different materials.

The Kitchen Knife manufacturing industry has a low level of market share concentration. The top five operators include Groupe SEB, Kai Corporation, Zwilling JA Henckels, Victorinox and Cutco Corporation, will account for about 30% of industry revenue. Groupe SEB, the industry's largest player, holds a significantly larger portion of revenue than any of its competitors at 9.5% of the industry's total. The next largest player is Kai Corporation, accounting for only 5.6% of industry revenue.
