Knitting napping machine is a kind of equipment specially used for surface treatment of knitted fabrics. It pulls up the fibers on the surface of the fabric through high-speed rotating bristles or metal needles to form a plush effect, which improves the softness, fluffiness and visual effect of the fabric. It is widely used in the finishing process of knitted fabrics such as sweaters, sportswear, home textile products, etc., making the surface of the fabric more tactile and shiny, while increasing warmth retention. Knitting napping machine has high efficiency and fine processing capabilities, suitable for the treatment of various fiber fabrics.
