Abstracts

Kojic acid with the chemical name 5-hydroxy-2-hydroxymethyl-4-pyrone is produced by several species of fungi, especially *Aspergillus oryzae*, which has the Japanese common name koji. It is a by-product in the fermentation process of malting rice, for use in the manufacturing of sake, the Japanese rice wine. ¹³C-Labeling studies have revealed at least two pathways to kojic acid. In the usual route, dehydratase enzymes convert glucose to kojic acid. Pentoses are also viable precursors in which case dihydroxyacetone is invoked as an intermediate.

Kojic acid is a mild inhibitor of the formation of pigment in plant and animal tissues, and is used in food and cosmetics to preserve or change colors of substances.

Scope of the Report:

This report focuses on the Kojic Acid in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In general, it can also be concluded that glucose and yeast extract are the preferred carbon and nitrogen sources for kojic acid production by various fungal strains. And the main production base is located in China, which account for 73.45% in 2016. Currently, Kojic acid has many industrial applications and its demand is increasing enormously with the growing industries related to its applications. And the cosmetics occupy the largest share, which was 75.71% in 2016. As the application of kojic acid in food has not been clearly recognized by the state, so its use is still relatively small. The global sales of Kojic Acid in 2016 have been over 2512 MT; the gross margin was 24%. The technology of the Kojic Acid is not difficult. And majority of the manufacturers can

ensure high quality, so their product can meet the high-end consumer's demand.

The worldwide market for Kojic Acid is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
