According to our (Global Info Research) latest study, the global Kraft Machine Glazed Paper market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Kraft Machine Glazed (KMG) paper is a type of paper that is produced using the kraft pulping process and is then surface-treated with a glossy glaze on one side by passing it through highly polished heated metal cylinders during the papermaking process. The glazing process gives the paper a smooth and shiny appearance on one side while the other side remains unglazed. KMG paper is known for its high strength and excellent runnability on printing and converting machines. It exhibits good resistance to tearing, grease, and moisture, making it suitable for a variety of applications. The glazed side of the paper provides a smooth surface that enhances the printability and gives a glossy finish to printed materials.
