Abstracts

L-Calcium Lactate is a biologically fermented organic calcium with the characteristics of high solubility, easy absorption, little gastrointestinal irritation, and high safety. Compared with most calcium supplements, L-calcium lactate has better solubility in water and can supply calcium ions in the intestines in a timely manner to meet the body's need for calcium. Its pH value is neutral and does not consume gastric acid, so it will not cause indigestion, constipation and other symptoms after consumption.

According to our (Global Info Research) latest study, the global L-Calcium Lactate market size was valued at US\$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
