## Abstracts

The global L-Menthol market size is expected to reach \$ 984 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

Menthol is an organic compound with the chemical formula  $C_{10}H_{20}O$  that occurs naturally in mint and some other plants. It can be extracted from the leaves by distillation, and it can be made synthetically. Pure menthol is a crystalline solid. The compound is widely used in cough and cold remedies because of its soothing effects and as a flavoring in candy, chewing gum, medical products and cigarettes.

The data of the report is based on the menthol product with purity of 99% min. And other products in lower menthol purity have been converted in the equivalent of 100%. L-menthol is the main product in the market because of its excellent performance. D-menthol is a by-product of producing L-menthol, and D / L-menthol is a mixture of D-menthol and L-menthol.

Global core l-menthol manufacturers include BASF, Agson Global and Symrise AG. The top three suppliers accounted for 33% of global market share. In terms of product, natural type is the largest segment, with a share about 63%. And in terms of application, the largest application is oral hygiene, with a share about 49%.

Menthol is mainly classified into the following types: Natural Type and Synthetic Type. Natural Type is the most widely used type which takes up about 71.2% of the total sales.

Menthol has wide range of applications, such as oral hygiene, pharmaceuticals, tobacco etc. And oral hygiene was the most widely used area which took up about 50.2% of the global total. In 2021H1, both United States and EU banned menthol-flavor cigarettes, which will lead the rapid decline in the using of tobacco application.

This report studies the global L-Menthol production, demand, key manufacturers, and key regions.
