The global LABSA market size is expected to reach \$ 5045 million by 2032, rising at a market growth of 2.0% CAGR during the forecast period (2026-2032).

Linear Alkyl Benzene Sulphonic Acid (LABSA) is an anionic surfactants with molecules characterized by a hydrophobic and a hydrophilic group. They are nonvolatile compounds produced by sulfonation. Linear alkyl benzene sulfonic acid are complex mixtures of homologues of different alkyl chain lengths (C10 to C13 or C14) and phenyl positional isomers of 2 to 5-phenyl in proportions dictated by the starting materials and reaction conditions, each containing an aromatic ring sulfonated at the para position and attached to a linear alkyl chain at any position with the exception of terminal one (1-phenyl).

According to types, the most proportion of the LABSA is LABSA 96%, taking about 70% sales share of global market in 2020. The most proportion of LABSA is used for Detergent and the proportion is about 93% in 2020. Asia Pacific is the major consumption region of the global market, which takes about 50% market share. The world's major dodecylbenzene sulfonic acid producers include Ho Tong, Nanjing Gige, CEPESA, SK, Nanjing Gige, Fogla Group and Sinopec Jinling Branch, etc.

This report studies the global LABSA production, demand, key manufacturers, and key regions.
