Abstracts

The global Lactulose market size is expected to reach \$ 245 million by 2032, rising at a market growth of 3.5% CAGR during the forecast period (2026-2032).

Lactulose a 'bifidus factor' is composed of galactose and fructose, which can be produced by the isomerization of lactose. It is a prebiotic carbohydrate which stimulates the growth of health-promoting bacteria in the gastrointestinal tract, it can also be used for the treatment of constipation, hepatic encephalopathy, tumour prevention, and to maintain blood glucose and insulin level.

Lactulose industry is concentrated relatively and is technology intensive industry. Currently, there are several producing companies in the world lactulose industry. The main market players are Abbott, Morinaga, Solactis, Fresenius Kabi, Illovo, etc.

In consumption market, Europe and North America are the mainly consumption regions due to the bigger demand of downstream applications. These two regions occupy over 70% of the global consumption volume in total.

Lactulose has two types, which include crystalline lactulose and liquid lactulose. And each type has application industries relatively. With pharmaceutical effect of lactulose, the downstream application industries will need more lactulose products. So, lactulose has a huge market potential in the future.

This report studies the global Lactulose production, demand, key manufacturers, and key regions.
