The global Laminated PDLC Smart Glass market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Laminated PDLC Smart Glass is a type of laminated glass via wiring PDLC film. When electricity is applied to the film, the liquid crystals align and the glass becomes clear; when the power is turned off, the liquid crystals return to their normal scattered positions rendering the glass an opaque translucent. It switches your glass from clear to frost with smart glass technology so it is named switchable glass, smart glass panel, laminated smart PDLC glass.
