## Abstracts

The global Land-based Aquaculture market size is expected to reach \$ 9893.3 million by 2029, rising at a market growth of 10.7% CAGR during the forecast period (2023-2029).

Global key manufacturers of land-based aquaculture are Pure Salmon, Atlantic Sapphire, Aquabounty, Matorka and Kuterra Limited, etc. The largest manufacturer is Pure Salmon which holds 5% of the global share. The global origins are mainly distributed in North America, Europe, China, etc., of which China is the largest production region, followed by Europe, with 66% and 10% shares respectively. In terms of its product type, saltwater aquaculture is the largest segment, with about 75% share. Meanwhile, in terms of downstream, retail sector is the largest downstream segment with 57% share.

Aquaculture is an agribusiness just as dairy farming or the arable crop farming of maize are. However, unlike the latter two, in general the former is a less developed business type. As such there can be big gaps in our knowledge. This lack of technical knowledge and experience in farming a specific aquaculture species often leads to uncertainty and risk for the business operator. Land based aquaculture covers those ventures that are farming aquatic organisms on land – not in the ocean.

This report studies the global Land-based Aquaculture production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Land-based Aquaculture, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and

competition, as well as details the characteristics of Land-based Aquaculture that contribute to its increasing demand across many markets.
