Landscape buried box-type substation is a kind of power equipment that combines environmental beauty and functionality. It is mainly composed of underground transformer and advertising light box type outdoor switchgear. Underground transformer is a new compact substation equipment composed of transformer, load disconnecter, fuse, etc. It does not occupy the surface space and can be submerged in water for a period of time. Advertising light box type outdoor switchgear is a hybrid structure that integrates billboards and outdoor switchgear and is installed on the ground. The inside of the box is an isolated low-voltage switch cabinet, and the two sides are advertising light boxes, which have an extreme visual effect. Landscape buried box transformer has beautiful appearance design, environmental integration, functionality, safety and reliability. It is suitable for places with high requirements for environmental quality such as urban green belts, parks, and high-end residential areas.
