In road-transport terminology, a lane departure warning system is a mechanism designed to warn the driver when the vehicle begins to move out of its lane on freeways and arterial roads.

These systems are designed to minimize accidents by addressing the main causes of collisions: driver error, distractions and drowsiness. There are three types of systems: Systems which warn the driver (lane departure warning, LDW) if the vehicle is leaving its lane (visual, audible, and/or vibration warnings); Systems which warn the driver and, if no action is taken, automatically take steps to ensure the vehicle stays in its lane (lane keeping system, LKS); Systems which take over steering, keep the car centered in the lane, and ask the driver to take over in challenging situations.
