## Abstracts

A local area network (LAN) is a group of computers and associated devices that share a common communications line or wireless link to a server. Typically, a LAN encompasses computers and peripherals connected to a server within a distinct geographic area such as an office or a commercial establishment. LAN Speed Test was designed from the ground up to be a simple but powerful tool for measuring file transfer, hard drive, USB Drive, and Local Area Network (LAN) speeds (wired & wireless). WAN is Wide Area Network or in some areas Wireless Area Network, it is combination of several LAN's (Local Area Network).

### SCOPE OF THE REPORT:

This report focuses on the LAN/WAN Test Equipment in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The development of enterprise networks should further lift the demand for test equipment. In order to withstand sales, test equipment vendors need to track evolving standards, reduce product development time and incorporate standards into test equipment designs. High demand and large-scale enterprises installing LAN/WAN test equipment in their sites, and the necessity for the performance analysis of the networks are estimated to boost market growth.

Quality of Service (QoS) has become an integral part of organizations, which depends on various providers such as equipment vendors, national carriers, global service providers, and system integrators for high quality and effective performance. E-commerce, online trading, and triple play enhance the private enterprises' environment owing to the need for IT networks. Security concerns such as breaching and leakage

losses oblige the use of test equipment to handle the emerging technologies. The necessity to protect networks from hackers, virus attacks, ominous losses, and rupturing are also expected to propel the LAN/WAN test equipment market growth over the forecast period.

The worldwide market for LAN/WAN Test Equipment is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
