Abstracts

The global Laptop Camera Controller market size is expected to reach \$ 229 million by 2029, rising at a market growth of 5.9% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Laptop Camera Controller are Realtek, Sunplus Innovation Technology, Sonix Technology, Vimicro Corporation and Genesys Logic, which make up over 75%. Among them, Realtek is the leader with about 30% market share. China is the largest market, with a share about 65%, followed by North America and South Korea, with the share about 7 % and 5%. In terms of product type, USB 2.0 occupy the largest share of the total market, about 85%. And in terms of product Application, the largest application is Consumer Use, followed by Commercial Use.

Camera Controllers are powerful yet cost-effective single-chip solutions designed to replace the complex and costly chipsets used in current PC Camera IC designs. These PC Camera processors can provide users with high quality image and video applications in any given resolution.

The chip composition of a notebook camera usually includes the following key parts: 1. Image Sensor (Image Sensor): responsible for converting optical images into electrical signals. Common image sensors include CMOS (Complementary Metal-Oxide-Semiconductor) and CCD (Charge-Coupled Device). 2. Image Processor (Image Processor): Image processing is performed on the raw data from the image sensor, including noise reduction, sharpening, white balance, etc., to improve image quality. 3. Driver Chip: Responsible for controlling the work of the image sensor and image processor, including data transmission, sampling frequency, exposure control, etc. 4. USB Bridge Controller (USB Bridge Controller): connect the camera with the computer to realize data transmission and communication. 5. Microphone Chip: Some notebook

cameras also integrate a microphone for recording audio. 6. Lens (Lens): Used to focus and control light entering the image sensor. The above is the common chip composition of notebook cameras, and different brands and models may have slight differences.

Since Apple laptops use self-developed chips, we do not include them in the statistics.
