Large bore three piece pneumatic actuator ball valve (DN Above 300) is a heavy-duty large-caliber automatic fluid control valve applied to main process pipelines and trunk lines of large industrial projects. Powered by compressed air, it realizes reliable cut-off and flow control for massive flow media under high pressure. It features ultra-high structural strength, superior sealing performance, strong pressure and temperature resistance, stable operation and easy maintenance, which can adapt to harsh working conditions and guarantee long-term safe operation of large-scale pipeline systems.

The price of DN Above 300 three piece pneumatic actuator ball valve varies by material, pressure class, actuator type and purchase quantity. The average unit price of mainstream products stands at 40,400 US dollars per unit. Bulk orders are entitled to a discount of 10% to 25%. The industrial chain is well-established. The upstream covers high-strength metal raw materials, special sealing parts, fasteners and heavy-duty pneumatic accessories. The midstream undertakes precision processing, professional assembly and strict performance inspection. The downstream connects manufacturers, engineering contractors and operating enterprises engaged in petroleum, chemical industry, power, water supply, heating and other fields, forming a complete industrial chain ranging from raw material supply to end application.
