Abstracts

Large industrial fans are HVLS fans that typically measure 6 feet and up. These fans are meant to circulate a large amount of air by using air streams. Air is pulled from above the fan and pushed down in a conical shape to the floor below. These highly efficient, cost-saving commercial ceiling fans are being used in warehouses, distribution centers, gymnasiums and a variety of other applications. Rotating at an optimized low speed, HVLS industrial fans move the most air over the largest area at the lowest cost. The wind blown from large industrial ceiling fan feels like natural breeze system, the wind speed is just the best cool feeling of human skin.
