## Abstracts

The global Large Language Model(LLM) in Legal market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

LLMs are artificial intelligence systems that can generate human-like text based on a given prompt. These machine learning models are trained on a diverse range of internet text, enabling them to respond to queries, write essays, summarize texts, translate languages, and even generate creative content such as poems and stories. In the legal profession, where research, drafting, and document analysis take the lion's share of professionals' time, LLMs can significantly alter the workflow, efficiency, and overall practice.
