The large-span high-lift jet fire truck is a high-tech fire-fighting equipment specially designed to handle large and complex fire scenes. The large-span high-lift jet fire truck is mainly used for efficient and flexible firefighting operations at large fire scenes. It can quickly and accurately transport firefighters or fire-fighting media (such as water, foam, etc.) to high or inaccessible areas of the fire scene, and achieve precise strikes on the fire. The large-span high-lift jet fire truck is equipped with a long boom with a large length and amplitude, which can cross various obstacles and reach high or inaccessible areas of the fire scene. The posture of the boom can be adjusted arbitrarily, and the movement is flexible, which can achieve all-round and multi-angle firefighting operations. A fire cannon is usually installed at the end of the boom, which has a large flow and high-range spraying capability. The fire cannon can spray water, foam and other fire-fighting media to accurately strike the fire.
