Abstracts

According to our (Global Info Research) latest study, the global Laser Direct Structuring (LDS) Grade Resin market size was valued at USD 450.5 million in 2023 and is forecast to a readjusted size of USD 1177.3 million by 2030 with a CAGR of 14.7% during review period.

For LDS technology to work the plastic material must be Laser Direct Structuring (LDS) grade – meaning there is a small amount of an organo-metallic compound added to the plastic. The organo-metallic material can be activated with laser ablation and acts as the catalyst for electroless plating deposition. The amount of the additive is very low and, when not activated, alters the physical characteristics of the plastic material...

Global core laser direct structuring (LDS) grade resin players include Mitsubishi, SABIC and RTP Company etc. The top 3 companies hold a share about 47%. Asia Pacific is the largest market, with a share about 90% , followed by North America and Europe.

Due to the downstream application drive, the market will maintain stable growth and good profit situation in the forecast period. Due to the upgrading of technology, there will be a certain increase in R & D and production costs, and a certain increase in prices. Rapid growth of production will play an important role for the growth of business income.
