According to our (Global Info Research) latest study, the global Laser Length Measuring Machine market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Laser distance meters are used for non-contact, high-precision distance measurement using laser light.

They use a visible laser with a wavelength of several hundred nanometers, enabling measurement with a high resolution of sub-micrometers. A laser beam is irradiated onto a corner cube attached to the sample, and the distance to the sample is measured by analyzing the phase difference of the reflected laser beam.
