According to our (Global Info Research) latest study, the global Kuwait Diesel Gensets market size was valued at USD 2421 million in 2023 and is forecast to a readjusted size of USD 3556.1 million by 2030 with a CAGR of 5.6% during review period.

The construction industry in Kuwait is booming with a series of new projects to be completed during the forecast period. As a result, demand for diesel gensets is likely to rise in the near future. Apart from being a reliable source for standby power, diesel gensets are also used to provide continuous power during working and completion of large construction projects.

The oil industry is the economic backbone of Kuwait and uninterrupted power supply is critical to ensure upstream and downstream operations can be carried out efficiently and without interruption. The price of diesel in Kuwait is also significantly low as compared to the global average, thereby resulting in faster adoption of diesel fuel for the purpose of power generation. While smaller variants of diesel gensets are preferred for prime power purposes, higher capacity diesel gensets may also be utilized in large facilities for backup power. Though numerous power projects are in development stages, the country's reliance on diesel gensets for power supply is likely to remain high until these are commissioned.
