According to our (Global Info Research) latest study, the global Laser Marking System market size was valued at USD 2952.9 million in 2022 and is forecast to a readjusted size of USD 4023.1 million by 2029 with a CAGR of 4.5% during review period.

The effect of laser marking is to expose deep materials through the evaporation of surface materials, or to burn off part of the materials through light energy to reveal the graphics and text that need to be etched. Most metals can be marked using a laser marking machine.

Laser marking system is laser equipment that uses laser beam to permanently mark the surface of various materials.

Compared with traditional marking technology, laser marking technology not only has more advantages in material loss and marking effect, but also is even better in terms of production and processing efficiency and output. Some new laser marking machines that are constantly being developed and applied are even more incomparable with traditional marking technology.

In the global market, the core manufacturers of laser marking systems are Han's Laser, Trumpf, Keyence, and other companies. The top five companies within this industry account for about 20% of the market share.
