## Abstracts

According to our (Global Info Research) latest study, the global Laser Rangefinder market size was valued at USD 1074.1 million in 2023 and is forecast to a readjusted size of USD 1857 million by 2030 with a CAGR of 8.1% during review period.

A laser rangefinder is a rangefinder which uses a laser beam to determine the distance to an object, which has been in use as early as the introduction of lasers; it is a useful optical method for measuring distance. LRF is based on time-of-flight method, and it employs light waves. This technique is based on a transmission of a short pulse of electromagnetic radiation and the reception of back scattered signals from a target.

The precision of the instrument is determined by the rise or fall time of the laser pulse and the speed of the receiver. One that uses very sharp laser pulses and has a very fast detector can range an object to within a few millimetres.

Global Laser Rangefinder main players are Trueyard, Vista Outdoor, ORPHA, NIKON, etc. Global top four manufacturers hold a share over 60%. North America is the largest market, with a share nearly 30%.
